

mekdrive[®] 2

compactus[®]
storage and filing

"Simply Revolutionary"

mekdrive[®] 2 has revolutionised in office filing and storage with leading edge technology and offers incredible value. It is the lightest mechanically assisted mobile storage system available which keeps floor loads to a minimum; a major consideration in most high rise office buildings. Best of all, mekdrive[®] 2 features a unique belt drive system that moves bays effortlessly which reduces operator strain and potential causes of injury.

Features

- Create an extremely efficient high density filing and storage system by mounting Ultima[®] CI-80 shelving onto the attractive mekdrive[®] 2 track and runner system
- The innovative low profile track design provides great strength and enhanced mobility for the mekdrive[®] 2 base runners
- Attractive clip on track ramps further reduce trips hazards and allow for the movement of trolleys or wheelchairs between shelving bays. The pivoting ramps follow the contour of the floor and provide a seamless transition between the flooring material and track
- Multiple track configurations apply better distribution of floor loads
- mekdrive[®] 2 needs no fixing into the floor. This eliminates any permanent damage to floors and flooring material, plus allows for cost the effective relocation or reconfiguration of the systems as needs arise.
- The unique track based anti-tilt mechanism secures all shelving, further enhancing operator safety
- Easily add to your mekdrive[®] 2 system should the need arise
- A choice of locking options provides added security.

Dimensions & Specifications

Drive type:

- Belt drive via hand wheel

Bay dimensions (based on Ultima[®] CI-80 shelving):

- Unit heights (from floor) – 1940mm, 2240mm, 2465mm
- Shelf Widths – 750mm, 900mm, 1200mm
- Shelf Depths – 300mm, 400mm, 450mm, 600mm

Maximum unit width:

- Up to 2700mm made up of one or more of the standard bay shelf widths

Bay carrying capacity:

- Up to 500kgs (refer to Ultima[®] CI-80 specifications for individual shelf loading capacity)

Maximum movable block load:

- Up to 4000kgs

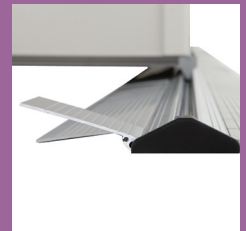

mekdrive[®] 2 is effortlessly moved using a unique belt drive system which reduces user strain and the potential of injury

The unique runner mounted anti-tilt mechanism secures the shelving units to the tracks

Stylish & sleek track system provides easy access between shelving bays

The pivoting track ramps follow the contour of the floor and provide a seamless transition between the flooring material and track
